

HOW TO LIVE LONGER BETTER

Sir Muir Gray is leading a revolution to Live Longer Better.

As we age our body undergoes several changes, making it challenging for some to perform day to day activities with ease. By staying active, and improving mobility and fitness levels, we can depend less on others and lead a healthy and independent life.

Exercising can take place anywhere, including using our natural environment, it doesn't need to take hours nor do we need to buy any equipment. Below is a standing exercise that can help to improve circulation and overall mental and physical well being.

SEATED TOE LIFTS

Sitting straight on bench. Lift your toes on your right foot, keeping the left foot on the ground. Hold for 3 to 5 seconds. Lower your toes. Repeat 15 times on each foot.

MARCHING IN PLACE

Stand straight, holding onto a bench. Lift your right knee as high as possible. Now lower it, and raise the left leg. Return to the original starting position and repeat 10 times.

FLAGS INDICATE THE START OF EACH ROUTE

- 1 Sir Muir Gray suggests, in order to improve health and reduce the risk of heart disease and stroke, we should aim to be physically active every day. This short walk through Lightburn Park will help to improve your physical health over time.
- 2 Why not stay a while and enjoy the small garden here? Sit down and enjoy being surrounded by nature. Spending time in nature has been found to generate positive emotions such as calmness, joy and can facilitate concentration.
- 3 Why not stop here and try some strength activities? Try sitting on the bench and standing up and back down again five times. We know improved coordination will reduce the likelihood of falls later on in life. See overleaf for more exercises to enjoy when you are out and about.

- 4 Take a seat, have a rest. Enjoy being surrounded by your community and others enjoying the play area. We know loneliness can be a common theme of ageing and we hope by being out and about we can reduce this for you.
- 5 Can you take a seat and work on your flexibility? Stop, take a seat. Lets try 10 arm raises: sit upright with your arms by your side, raise both arms out to the side and then above your head. Repeat. This will build your shoulder strength.
- 6 Can you stop and use the steps found here in Lightburn Park? Frailty, falls and cognitive decline are not a necessary part of ageing. Try using walking up and down the steps, slowly and carefully, three times. This will help to improve your strength and coordination.

Part of the
LIVE LONGER BETTER.
in Cumbria
revolution!

Safety Brief: This map follows accessible footpaths and pavement walking. Please do take care when walking, paths can get slippery when wet. Dog walkers and their dogs are always welcome but please do keep them on a lead and clean up after your dog. Follow the countryside code and always leave no trace of your visit.
